

compliance

and your merchant account.

We don't put a price on your customers' card security... Neither should you.

PCI Compliance is a standard of security established for any business that processes credit cards. Whether you have a computerized POS system, process over a phone or a credit card terminal, or have an e-commerce website, PCI establishes a series of best practices and minimum security protocols that must be observed for your business type.

Electronic Payments, an industry leading payment processor and your trusted processing partner, has created a website to aid and assist you in becoming fully compliant with PCI DSS (Data Security Standard), no matter your business size, method of processing, or your past experience with PCI Compliance.

While we have spent hundreds of thousands of dollars to achieve compliance with the PCI DSS, you don't have to! A quick 10-15 minute trip to our website will help you learn how to secure your cardholder data and safeguard your account against hefty fines and penalties.

Avoid Compliance Fees

In order to avoid monthly compliance fees, please visit pcicompliance.info and discover what PCI Compliance can do for your business. Click on "Get Compliant" and complete the Self Assessment Questionnaire (SAQ) in just 15 minutes! And with our free SAQ Wizard, the savings will be as much as \$240 per year!

Learn More
